

Experience High-touch Care

River City Home Care brings together a team of experts to provide aging adults with the high-quality, personalized support they need, empowered with the most advanced Care Platform technology.

Fast starts of care

Prompt, reliable starts of care. Our 24/7 team swiftly matches clients with our extensive team of caregivers, providing relief as quickly as the next day.

Enhanced visibility into client care

Care Platform technology keeps our caregivers on top of their clients' evolving care needs and families connected to their loved one's care, in real time, via easy-to-use apps.

Readmissions prevention

The Care Platform scans our caregivers Care Notes for indications that a client may have fallen during or outside of care. Then it automatically alerts our Care Team so they can update the Care Plan with the goal of preventing future falls.

24/7 escalation & emergency management

Our Care Team includes RNs and specialists in safety management and emergency response. They stand ready to support our caregivers, clients and families on changes in condition, escalations or during natural disasters.

River City Home Care is ready to support you and the aging adults you serve. **Call us today.**
